

ABC'S OF ALZHEIMER'S AND DEMENTIA

Do you wish you had a better understanding of the stages, treatment options, and research?
Are you wondering what a family caregiver needs to know or where to go for help?

This informative program - for families, friends and caregivers of persons with Alzheimer's disease or related dementias - is designed to enhance your understanding of the disease; how it affects those who have it; and how to effectively deal with it day-to-day.

Presenter Dr. Gregory Motl worked for 33 years at the Sun Prairie Clinic of SSM Health - Dean Medical Group. He focused on the care of older adults and persons with dementia.

**Friday, June 18
10 am - 12 pm**
